

Clipfine Group of Companies is a leading provider of logistics and construction support services to the UK Construction industry and recognises its responsibility to minimise any potential adverse environmental impact of its operations.

The company is committed to upholding its duties as a responsible corporate body for the greater benefit of the environment and communities in which it operates, and will take a pro-active and balanced approach to managing its business activities in an environmentally responsible manner.

Clipfine seeks to ensure that all of its activities comply fully with relevant environmental legislation, the requirements of ISO 14001 and best industry practice. It strives for continual improvement of its environmental management performance by the setting of both business and operational objectives and works to prevent pollution across its business activities. To deliver its environmental policy Clipfine is committed to the following objectives:-

- Raise environmental awareness and communicate its environmental policy amongst our employees and clients and encourage best individual practice
- Develop a culture in which protection of the environment is a common objective shared with clients, contractors, suppliers and partners, and the communities in which Clipfine operates
- Understand the sensitivities of its customers, including the pressures of growing and changing statutory and public concern about environmental issues, and assist them in demonstrating compliance with environmental best practice

- Identify opportunities to reduce any environmental impact of Clipfine's activities at an early stage by adopting suitable mitigating measures e.g. the use of noise of suppression equipment
- Require our suppliers to provide goods and services with the minimum adverse environmental impact, and give preference to environmentally aware suppliers whenever possible
- Make efficient and environmentally responsible use of energy, water and other natural resources. We will only source from organisations wood based products that are legally harvested, not genetically modified, nor from forests with serious social conflicts
- We will not source wood based products from uncertified high conservation value forests
- Employ sound and efficient waste management practices and maintain emergency procedures to deal effectively with any significant environmental hazards which may arise as a result of its activities
- Reduce the environmental impact of business travel and transport logistics
- Integrate the above environmental objectives into its day to day activities
